SLEEP ACTIVE PILLOW CARE INSTRUCTIONS

General Care Instructions

- **NEVER** wash your Sleep Active® pillow
- **NEVER** soak your Sleep Active® pillow
- **NEVER** clean you Sleep Active® pillow with any chemical detergents
- If you pillow is dirty, please use a warm damp cloth and gently wipe the mark/s away.

Cleaning the cover

The covers on most of our pillows and cushions can be removed and washed. Please see washing instructions below.

About washing the cover

We recommend a cold temperature setting for machine washing and a cool setting for machine drying. Air-drying is best. Do not "over-dry" the cover/s and never use chlorine products, harsh stain removers of any kind or bleach or bleaching products.

Electric blankets or heating pads

We do not recommend using an electric blanket or heating pad with your pillow. Due to the temperature-sensitivity of the Memory Foam®, adding high heat can hinder its ability to react to your body temperature and conform to your body shape. If you ever do use an electric blanket or heating pad, we recommend limiting its use to 30 minutes, and then only on low or medium heat.
